POPULAR HOLIDAY FARES OFFERED

Winnipeg, Man., June 18.—Dominion Day, which falls on Sunday, July 1, brings with it the long week-end holiday and consequent attraction in reduced railway fares announced by Jos. B. Parker, secretary, Canadian Passenger Association, western lines. The holiday will be celebrated on Monday, July 2nd.

Special fares for this occasion go into effect on Friday, June 29, and provide single fare and one-quarter for the round trip between stations in

Canada on both the Canadian National and Canadian Pacific railways. They will be good going all day Friday, June 29, to 12 o'clock noon, Monday, July 2, inclusive, and returning to leave the destination not later than 12 o'clock midnight, Tuesday, July 3.

We regret to chronicle the death of Wilbur, son of John Eddy, of Beaver Mines, who passed away this week.

The marriage of Annie, only daughter of Mr. and Mrs. Paris Barattelli, to George Corrier, of Spokane, Wash., took place at Corbin on the 16th. They will make their home in Spokane.

SPECIAL OFFER

35c Campana's Dreskin (Both for 35c)
35c Italian Balm

Free Autographed Photo of Film Star given with each AGFA FILM, sizes B-2 and D-6 only

Woodbury's Soap, new size, cake 10c

Jergen's Laytrix Soap 3 for 25c
(Prevents Body Odor)

Three Flowers Travelette Package Each 25c
(Powder, Van. Cream, C. Cream and Perfume)

CALGARY EXHIBITION AND STAMPEDE

There is no doubt about the fact that the Calgary Exhibition and Stampede, to be held July 9th to 14th, will be a great success. The co-operation that is being extended and the special features that have been arranged are exceptional. In addition to celebrating the 50th anniversary of the incorporation of Calgary, there are the usual features that will be staged on a larger scale than ever. These will include live stock, industrial and domestic exhibits, for which the prizes have been increased by over \$1,000; the Stampede parade; the Stampede, for which H.R.H. The Prince of Wales has just donated a challenge trophy and gold belt buckle for the champion Canadian bucking horse rider, with an increase in general prizes of over \$400; the mammoth stage production, "The Show of a Century," running horse races, with an addition in purses of \$700 and the addition of a second starting chute, so that all races can be started from the chute; the Live Stock Review for girls and boys with free prizes of ponies and dogs; gorgeous fireworks programme; horse shoe pitching tournament; special day Shopping Day; Boy Scouts' mobile camp; outstanding collection of paintings for the Art Gallery; Morning Street Display and the Dog Show.

In addition, the following extraordinary features have been arranged for:

Giant Television. This wonder-invention is the result of almost a million dollars in research. Mr. Sanabria, the inventor, is only 26. The display is made by the General Television Corporation of Canada and is staged as a free educational exhibit by the Calgary Exhibition.

The Hunter's Paradise. A temporary exhibit of practically all the wild life of Western Canada.

Alpha, the Robot. This mechanical man weighs 7000 lbs. and is one of the scientific marvels of the age.

Tractor Races. New thrills with drivers of international reputation.

Royal American Shows. Will provide fun on the midway. Four ferris wheels. Al Capone's armored car. Light from battleship flood lights can be seen forty miles. Some outstanding features of the Chicago World's Fair will form part of the midway.

Special railway passenger fares are to be in force from Saskatchewan, Alberta and British Columbia mainland points; and two special excursions will be run from Alberta and British Columbia mainland points, good going July 10th and returning to the 12th, and good going July 13th and returning to the 15th, with an additional two days' return limit from B. C. points.

Very low admission charges will be in force and the programme will without question be the most interesting ever arranged for the Calgary Exhibition and Stampede. Price list of the Exhibition, the Stampede and races, folder, hanger and general information may be obtained from E. L. Richardson, general manager, Calgary.

We understand that the Band-Its orchestra has been secured for the big dance in the Columbus hall on July 2nd.

The Liberals were swept to victory in the provincial elections in Ontario and Saskatchewan this week. Hepburn, Liberal leader and now Ontario premier, has 65 seats assured. Gardiner is to be the new premier of Saskatchewan. In Ontario, where quite a number of Communists ran for election, including Smith, not one was elected. Hon. Duncan Marshall, former minister of agriculture in Alberta, was elected in Peel, and is slated as the new minister of agriculture in the Hepburn cabinet.

THE PASS SEVEN— TEEN YEARS AGO

(The Blairmore Enterprise, 1917)

Dec. 14.—The Bellevue Branch of the Red Cross Society announce through their annual meeting that for the fiscal year ended October 20th, a total amount of \$5002.50 was collected with disbursements \$5002.50.

Hon. Duncan Marshall, minister of agriculture, announces his programme for increasing hog production in Alberta. He doesn't mention the road hogs, however.

Lieut.-Colonel W. C. Bryan, of Macleod, has been appointed inspector of the provincial police, to succeed A. Schurer, resigned.

Sir Wilfrid Laurier addressed two large mass meetings in Calgary Wednesday night of this week, at the Grand theatre and Knox church.

Capt. J. W. Verge, former principal of the Blairmore school, has arrived back to Calgary from England.

Paul Thibadeau received word this week of the death of his father at Missoula, Montana.

Costello was re-elected mayor of Calgary this week by a majority of ten.

John Kerr, of Passburg, secured a large brown bear this week.

Dr. A. H. Baker left Vancouver on Friday last for the front, via China. Mr. and Mrs. A. Wardman, of Burnaby, received word this week of the death of their son Taylor, who died from injuries sustained at Ogden, Utah.

Dec. 21.—According to latest returns, H. M. Shaw's majority over D. R. McIvor in the Macleod riding is 1373.

Miss Nellie McWilliams is spending the winter down east, having resigned the position of teacher of the Lundbeck school.

Mr. and Mrs. L. M. Langbrook and little son left Calgary on the 17th for their old home in Newfoundland, where they hope to spend a few weeks.

Corpl. Vic Hawkins, formerly of Cowley, has been reported missing from the Fort Garry Horse since the Battle of Cambrai. It was in this same battle that Major Wallace Sharpe was severely wounded, necessitating amputation of a leg.

The marriage of Joe Folino, of Blairmore, to Miss F. Adams, of Calgary, took place at Calgary recently.

The marriage of Mr. M. H. Congdon, of the West Canadian Collieries' staff at Bellevue office, to Miss Christina McLeod, of Blairmore, was solemnized by Rev. Harry Peters at the home of the bride's parents here on Monday evening.

Archie McLeod has resigned the position of chief of police at Blairmore.

The marriage of Jake Whittier, of Hillcrest, to Mrs. Hunter, took place on Friday. Rev. W. T. Young performed the ceremony. Jake was a former resident of Twillingate, Newfoundland.

Dec. 28.—J. T. Hunter, brother of J. F. Hunter, of Blairmore, was killed in an auto accident near Aldersyde on Saturday.

Mrs. Hugh Hutton, of Bellevue, died rather suddenly at Fernie on Monday night, while visiting friends there. The remains were laid to rest in the Blairmore cemetery, Rev. W. T. Young officiating.

Pte. Charles Harrison, who recently returned from overseas, arrived home from Calgary this week.

Among other matters considered at a recent unemployed conference at Fernie was the pushing of road projects to provide for the placing of some 700 unemployed in the district at a rate of 50 cents an hour. The major project discussed was improvements and extension of the Corbin road into the Flathead oil field, thus securing the supply trade for Fernie and district which now flows through the only existing outlet into the United States.

DEATH OF MRS. JOHN HERRON

Mrs. John Herron, wife of John Herron, an early member of the North West Mounted Police, died at Pincher Creek on Wednesday morning of last week, at the age of 78 years.

Mrs. Herron was born in Oakwood, Ont., and came to the Pincher Creek district in 1882. She had always taken an active part in the pioneer life of Southern Alberta, particularly in the work of the Presbyterian church. Mr. and Mrs. Herron celebrated their 56th wedding anniversary on June 11. In addition to Mr. Herron, Mrs. Herron leaves three daughters and seven grandchildren. Her daughters are: Mrs. Ambrose, of Pincher Creek; Mrs. J. L. Jamieson, of Calgary; and Mrs. Geo. J. Hunter, of Red Deer. There was a large attendance of old friends at the funeral at Pincher Creek on Friday afternoon.

Services Sunday, June 24th, the minister in charge.

10 a.m.—JUNIOR SCHOOL.
11 a.m.—SENIOR SCHOOL.
7:30 p.m.—PUBLIC WORSHIP and Communion Service.

ST. LUKE'S CHURCH NOTES

Rev. A. S. Partington, B.A., Rector

Services Sunday, June 24th:

Sunday School at 10 a.m. in the church.

Morning service at 11 o'clock.

UNITED CHURCH NOTES

Sunday evening, June 24th, will be communion Sunday. The congregation are requested to be in their places for this pre-holiday service of dedication and commemoration. It is both the privilege and duty of all church members and followers of Jesus to attend the Sacrament of the Lord's Supper.

Throughout July and August various camps are being held for boys, girls and young people. Parents are urged to permit their children to avail themselves of the privilege and pleasure of camp life under fine leadership. Any information concerning these camps may be secured through the minister, Rev. A. S. Lark.

Miss Isabel Duncan, daughter of Mr. and Mrs. James Duncan, of the Michel hotel, a bride-elect of this month, was the guest of honor recently at a prettily arranged miscellaneous shower held at the home of Mrs. Harry Adams, Michel.

Again referring to Beaver Creek—it is known that grayling and bull trout are today inhabiting this creek in large numbers, and unless some steps are taken to eradicate them, this creek will never amount to a source of real supply of good fish to the larger streams. The specie of fish that has inhabited this stream since Alberta became a province is a specie far out-run, and should be replaced by some hardier and larger fish.

A good attendance of fans is assured.

WORLD HAPPENINGS
BRIEFLY TOLD

The House of Commons in committee of ways and means, approved the amendment to the gold tax moved by Hon. E. N. Rhodes, finance minister.

The disarmament conference adjourned June 12, for a long "breathing space," in which governments will attempt to settle outstanding political difficulties.

Expansion of the British air force, announced some time ago, contemplates the addition of 50 squadrons, totalling roughly 600 machines, it was learned.

Fire of unknown origin destroyed the Quaker Oats elevator at Delisle, Sask. More than 9,000 bushels of grain in the house were ruined. The loss was covered by insurance.

John Duncan, veteran railway telegrapher, died recently in Toronto, aged 91. He succeeded to the job late Thomas Alva Edison, famous inventor, held as telegrapher on the Northern Railway.

The Victoria Daily Times, first published on June 9, 1884, celebrated its golden jubilee by publishing a special anniversary edition. The paper was founded by the late John Grant, M.L.A. for Cassiar at the time.

Declared as a record without rival in book selling in South Africa, 150,000 copies of the new Afrikaans Bible have been sold in the South African Union and the Rhodesias since its issue a few months ago.

Soviet Russia's crop sowing plan for this year was 98.2 per cent. complete the first week in June. On that date 228,228,000 acres had been seeded. It is the largest area ever cultivated by the Soviet Union.

Market for Timothy Seed

Shortage in Production Is Opportunity for Western Growers

Domestic production of timothy seed in Canada is still far short of consumption, it is noted in a report of the Saskatchewan Department of Agriculture, indicating an opportunity for growers in the West. Timothy ordinarily yields from 200 to 300 pounds of seed per acre, and growers have received on an average about 6 1/2 cents per pound of the seed basis No. 1 grade, over the past three years. Canada uses annually about ten million pounds of timothy seed and until 1931 some nine million pounds of this was imported from the United States. Domestic production since 1931 has been greatly stimulated by educational activities and the prospect of a large domestic market. As a result, production increased from less than a million pounds to some five million pounds in 1932, but declined to about 2,700,000 pounds in 1933.

Melons Save Bank Notes

Unusual Happening in Fire at Constantinople Law Courts

A few weeks ago a great fire destroyed the Law Courts at Constantinople. The damage done was very heavy, but the chief concern of one official centred in a safe in which he had placed funds to the value of \$5,000. Ultimately the safe was located amid the debris, and to all appearances it was a mass of warped metal, but the door was forced, and it was found that the money placed there by the cashier could be saved. The official had placed in the safe two large melons and they had given off sufficient steam during the fire to prevent the complete destruction of the notes. Some criticism had been done but the numbers of the notes were visible and the State Bank accepted them.

Appreciates the Press

It is well to know that there is at least one man in public affairs who has an appreciation of the press, says the Lethbridge Herald. This is Lord Londonderry, Secretary for Air in the British government. Speaking of the British press, he said: "We find the press men fair and helpful, sparing in their criticism and generous in their praise." This is regarding the press in the light it deserves to be regarded.

"Did any of your ancestors do things to cause posterity to remember them?" asked the haughty woman.

"I reckon they did," replied Farmer Courtneay. "My grandfather put mortgages on this place that ain't paid off yet."

England is on the verge of the greatest agricultural revival of the last fifty years.

W. N. U. 2061

Air Mail Across Canada

Coast-to-Coast Airmail in 19 Hours Is Predicted

A coast-to-coast air mail service in 19 hours, travelling in aeroplanes capable of flying the sky lanes from Montreal to Vancouver at a speed of more than 200 miles an hour, is the hope of Canadian airmen.

Squadron Leader A. T. Cowley, superintendent of air regulations, when in Calgary on an inspection tour, outlined plans for the fast mail service of the future—to be put in operation when economic conditions are better.

The proposed route would take a western aerial trail via Regina, Lethbridge and the Crow's Nest pass to Vancouver, making a direct mountain crossing to the coast. A branch service would be maintained from Calgary to Lethbridge.

Raining Gold

Peculiar Phenomena Is Reported in India As Result of Earthquake

The world may talk of gold standards and gold hoarding but in India it has been raining gold. Outlying districts in which seismic disturbances were felt recently, reported a shower of fine powdered gold and dust stories of golden clouds of dust floating low over the country side.

The secret of the color of the dust was revealed when scientists analyzed samples and discovered that the dust harbored fine particles of the precious metal. The dust clouds came as a result of the earth shocks which the scientists suggested forced into the air delicate particles from deep rock fissures.

Little Journeys in Science

RADIUM

(By Gordon H. Guest, M.A.)

In 1910 Madame Curie culminated many years of efforts, when she succeeded in isolating radium and giving to the world a new science, that of radio-activity. This French lady has since become a figure of international importance for her work in connection with radium. Of Polish origin, she began the work with her husband, Pierre Curie, a professor of physics at the Sorbonne, in Paris. To-day she still directs radium research in the Radium Institute, on the Avenue Pierre Curie, in Paris. This institute was built as a memorial to Professor Curie who died in 1906, and thirty workers carry on studies in radio activity, under the direction of Madame Curie.

Radium is taken from pitchblende, where it occurs in very small quantities. It is estimated that three tons of pitchblende, which is sometimes called uranium oxide, contain about one gram of radium. The world supply of radium is said to be about 170 grams, and the chief source of supply is in the Belgian Congo. It was at first valued at from \$100,000 to \$125,000 a gram, but with the discovery of new sources of supply it has come down to from \$60,000 to \$70,000 per gram. At the Radium Institute are two grams of the substance, one of which two procured by the Curies in their early work, and one of which was presented to Madame Curie by the women of America when she visited this continent several years ago.

Radium, however, is a long-lived substance. In spite of the fact that it gives off extremely concentrated rays of heat and light; it does not diminish appreciably in volume or strength, and it is said that one gram of radium would lose half its volume by radiation in 1700 years. Through these calculations scientists have been able to do determinations on the age of the earth, through the study of radio active substances found on its surface.

Because of the extremely strong power of penetration possessed by the rays given off by radium, it has found many uses in science and industry. Outstanding is the development of its use in the treatment of some types of cancer and of numerous skin diseases.

In industry it is used in the production of a luminous paint, familiarly seen on the faces of clocks and watches. In recent years large deposits of pitchblende have been discovered in Canada, in the region of Great Bear Lake near the Arctic Circle. It is expected that within the next few years this deposit will increase the world's supply of radium sufficiently to bring down the price considerably.

France will retire 80,000 of its 860,000 government employees.

An Admiralty Court

Canada Has Passed Another Constitutional Milestone

Canada passed another constitutional milestone recently when the House of Commons gave third reading to a bill designating the exchequer court of Canada as an admiralty court. Admiralty litigation has been heard for years by the exchequer court but under an Imperial Act. The 1929 conference on merchant shipping legislation reported control of admiralty courts was not in accord with the constitutional status of the Dominion as established at the 1926 Imperial conference. The bill, sponsored by Minister of Justice Hugh Guthrie, gave Canada control of admiralty courts and set forth the necessary regulations. It passed through committee stage in less than five minutes and passed the house without opposition.

An Unenviable Record

United States Leads With Total Of 10,617 Murders

The lowest per centage of murders goes to the credit of Holland, with Great Britain a good second. The highest is to the discredit of Chile, but the highest total is recorded in the United States. In Chile, during 1932, the last year for which statistics are complete, there were 2,913 murders, equivalent to 61 per 10,000, or one murder every three hours. The United States show 8 1/2 per 10,000; the total is 10,617. The highest per centage in Europe goes to Belgium with 186 murders, but Germany has the largest aggregate (1,223) though this averages only 1.58 per 10,000 of the population. In the nine countries under review the total murders amounted to no fewer than 16,108.

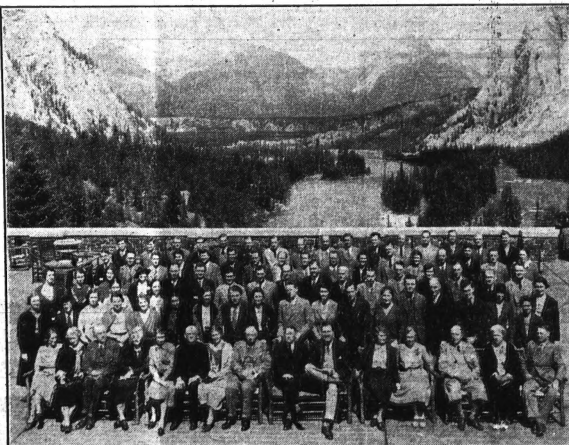

The Panama Canal

Building Made Possible Only Through Concessions From British

Arthur Brisbane, protesting in the Hearst papers against Great Britain's failure to pay her debt to the United States, suggests that the Panama Canal rates might well be doubled against her. But the Panama Canal was built under an international agreement whereby the rates for British and American vessels would be the same. It ought not to be forgotten that the building of the canal was only made possible through certain British concessions. — Toronto Mail and Empire.

Rose growing under glass has become a very important industry.

SUNDAY SCHOOL LESSON

JUNE 24

A REVIEW OF THE GOSPEL ACCORDING TO MATTHEW

Golden Text: "Of His kingdom there shall be no end." Luke 1:33. Devotional Reading: Micah 4:1-5.

1. What does the heading "The Gospel According to Matthew" mean? 2. What do we know about Matthew from the Gospels? 3. What is the tradition in regard to him? 4. What was the earliest record of the life of Christ? 5. In what language was the Gospel of Matthew written? 6. In what language were the earliest manuscripts of the Gospel? According to Matthew written which has come down to us? 7. In what century were they written? 8. For whom was the Gospel According to Matthew written? 9. What special Jewish phrases does it contain, and what does their use indicate? 10. About when was the Gospel written? 11. Is Matthew a complete biography of Jesus? 12. What is the main purpose of the First Gospel? 13. How many quotations from the Old Testament has it? 14. How large a portion of the book is given to the teachings of Jesus? 15. What five great addresses in the Book? 16. What part of Jesus' ministry does it omit? 17. How does Matthew group his material? 18. Give its general outline.

Fair Wage Schedule

New Ruling For Manitoba Applies To Private As Well As Public Works

Hon. W. R. Clubb, Manitoba minister of public works and labor, recently announced a new fair wage schedule for the province, applying for the first time to private as well as public works and containing reductions of from five to 10 per cent. from last year's rates for a large section of the building trades. The new rates become effective June 15 and were worked out on two months' study by the fair wage board. One set of rates is for Winnipeg and territory within a 30-mile radius and another for the rest of the province.

Stone masons have been allotted two rates, 80 cents and \$1 an hour, as against last year's rate of \$1.05.

Negro Undertaker (over telephone): "Rastus, your mother-in-law just died."

Rastus: "Is you sure 'bout dat?"

Negro Undertaker: "Shall I bury her or embalm her?"

Rastus: "Don't let's take no chances, brother. Cremate her!"

Austria is discouraging the importation of foreign automobiles.

Agricultural Notes

Many Items Of Interest To The Western Farmer

The quick-freezing methods of preserving foods still presents many problems for the plant breeder and the research chemist.

The highest grade alfalfa and clover means are associated with bright green colour; those of poor quality are coarse and yellow.

The use of resistant varieties of peas seems to be the best way of combating club-foot disease of those turnips.

As an average of all Eastern Canada, there were by the 1931 census only 41.8 acres in crop per farm which varied from 14.3 acres in Nova Scotia to 50.1 in Ontario.

According to a survey of Eastern Canada, two-thirds of the potatoes are sold four times as much per day as two-horse teams, and at a cost of \$1.20 less per acre.

Experiments are under way on Pacific Ocean transport ships to test the feasibility and economy of using artificial or natural ice—cold refrigerant for foodstuffs in transit by water.

A new process of sterilizing ice has just been developed in Germany. The sterilized ice is named "activated ice" to distinguish it from ordinary artificial or natural ice. Cold Storage News Letter, Dominion Department of Agriculture.

The silviculture of fish moth is becoming increasingly notorious as a household pest in Canada, particularly in urban sections of Ontario and Quebec. These moths have a special liking for artificial silk (rayon) products.

Disintegrated peat is finding an important place in the top dressing of golf courses and lawns. Its value for these purposes is greatly enhanced if it is first composted with "good" (solid carbonaceous) manure, and the resulting product screened.

In the Maritime provinces and Quebec mud deposits have largely been used in the past for soil enrichment. Good results as a rule followed the first application, but it was found in many cases that there was little response from repeated and continued applications.

The gypsy moth which has cost the New England States an enormous amount of money in keeping it under control, was first introduced to the States of Massachusetts in 1869 but it was not until 1924 that it gained an entry into Canada in spite of the efforts of the officers of the Dominion Entomological Branch.

In purchasing a fish meal, the guarantee should be carefully read, bearing in mind the desirability of a comparatively low fat content, combined with high per centages of protein and bone phosphate. If practicable, a sample should be obtained and examined as to freedom from rancidity.

Canada imports millions of pounds of dried apricots. Recent investigations at the Dominion Department of Agriculture Experimental Station at Summerland, B.C., have shown the possibility of proper varieties, cultivation and processing methods which may make Canada independent of outside sources.

Soybean flour, on account of its extremely low starch content, is especially valuable for diabetic persons. The flour is being successfully used in making bread, biscuits, muffins, pastry, etc., and by reason of its composition increases the nutritive value of these products.—Soybean Bulletin, Dominion Department of Agriculture.

Employment By Forest Industries

In Normal Times Annual Wage Bill Amounts To \$250,000,000

During the five-year period 1928-30 (which may be taken as a fair sample of normal conditions in the Dominion) the cutting of wood in the forest and the manufacturing of products of the wood in the lumber and related industries provided work, on a yearly basis, to 244,000 people; that is to say, if the work had been spread over the entire year that number of people would have been employed all year. Much of the work, however, is of a seasonal nature, so that the number actually employed in these industries was much greater. The annual wage bill amounted to about \$250,000,000—over forty-two per cent. of the value added to the lumber by manufacture. These figures are given out by the Forest Service, Department of the Interior, as the result of their investigation of the matter and are published in the pamphlet "Forest Facts, 1933" lately issued.

Wage strikes in Australia are increasing.

OCCASIONAL WIFE

By
EDNA ROSS WEBSTER
Author of "Joretta," "Lipstick Girl," etc.

SYNOPSIS

Camilla, Hoyt and Peter Anson, living and in love, are secretly deciding to live their own lives apart until Peter is able to provide for her. Peter is a young, struggling sculptor trying to win a competition for a scholarship abroad and Camilla is the adopted daughter of a wealthy family. She is not to inherit money when she comes of age and so is studying commerce and the art of landing an agency job. Others in the story are Avis Werth, another wealthy girl who is trying to win Peter, Sylvia Todd, Peter's model, and Gus Matson, his former roommate with whom he has quarreled. After a party at an exclusive club, when the rest of the members of the party go to a cabaret, Peter and Camilla slip off to the beach by themselves and fall asleep on the sand. When they wake up in the morning and find each other, they are standing near them. This makes it necessary for Camilla to announce before the party that she and Peter are married. Camilla agrees to let Peter marry her, but Peter refuses and they quarrel. After Camilla has gone to the studio, Avis Werth calls and persuades Peter to accept a loan of \$10,000. Peter finishes his exhibit and asks Avis and Camilla for suggestions as to a name for the exhibit. Camilla suggests "Eager Youth" and Avis "Inspiration." Peter adopts the latter title and Camilla, heartless, goes to Peter's studio for quiet and to think. Peter and Avis follow later, and as the lights are turned on, the two girls have been shattered to pieces. Avis accuses Camilla of doing this, and Camilla, stunned and shocked, is hurt and horrified by the accusation, faints.

(Now Go On With The Story)

CHAPTER XLVIII

Long silences and hollow, brief remarks, like those which all a house where death has passed, prolonged that seemingly endless night. Camilla and Peter. Neither of them slept. There was little to be said. Only their separate thoughts labored in a ceaseless turmoil and gained them nothing.

If it had been a problem to solve, a difficult decision to be made, it would have been different. But a thousand sleepless nights and all the thoughts of their lifetime could not efface this tragic thing that had come between them.

Camilla's tired eyes watched the windows being transformed into squares of gray patches with the approach of dawn, and the familiar objects in the room emerge from dark blot into definite shapes. The empty turn-stand mocked her deservingly and deepened her pain. For contrast, the modeled group in the window stood out sharply and proudly against the background of daylight.

If something had to happen to Peter's work, why couldn't it have been that piece which had been broken? It would have grieved her to lose it, but not like this. Over and over she had wondered how the thing could have happened. It didn't seem possible that it could have been an accident from some natural cause. No, it appeared to be a deliberate act. But who could have hated Peter like that? It was almost funny that anyone could believe she had done it—at least of all Peter.

MINARD'S
"KING OF PAIN"
LINIMENT

Not if he had flirted with a dozen girls and broken her heart, could she have done so terrible a thing for revenge. No, never. She loved Peter so much that she would do anything in the world for him. Then why should she be so revengeful just because he had hurt her with his silly attentions to Avis, to whom he felt obliged for some reason? His probably exaggerated that duty in his own mind because he always was kind things for other people. Avis had managed somehow to make him believe he owed her his gratitude.

Camilla had known all the time that Avis' sole purpose in taking that studio across the hall had been to influence Peter in her favor. Why any woman should so exert herself to take another woman's husband, she did not know. And wondered if, loving Peter as she did, he belonged to another, she would still make such an effort to win him back. She knew. She was sure enough to think that one never knew what one would do in another's extremity.

He used to say that all that now Peter's loss was irretrievable. She would have to comfort him as he would permit her, and help him to revive his hopes and dreams. She would gently lead him back to the beginning again, like those brave figures he had portrayed in the sculpture he had made for her. Gazing at it again, its beauty and significance struck her so forcibly that she sat up quickly with a little gasp.

Peter, whose eyes had been closed, not sleeping, looked at her quickly. "Peter, I have no idea," she exclaimed, and her face brightened rapidly. "Well," he promised listlessly. "You must enter your immigrant group in the exhibit. Looking at it, the day I had in mind, and framed in the lighter background of light from the window, I just now realized how wonderful it really is."

"If it took the pieces that long to discover how good it is, I might win the prize in another ten years," he mused.

"But, dear, even if you don't win, wouldn't it be better to enter something as good as that?"

"If I can't enter a piece that I believe has some chance at least, I'll stay out," she decided. "But it would have a chance. I know it would. If for no other reason, just because it is so different from most exhibit entries. Won't you please try it," she pleaded.

He moved his head to one side, negatively. "It's no use. Forget it. Perhaps next year."

"Peter, you have to do it," she insisted gently. "You might even pretend that you planned to use only one of the other figures for sale."

"To protect you?" he mumbled. "Oh!" she cried, wounded deeply. "Then you do believe what Avis said!"

"It isn't what I think. It's what all the others think who were here, and what they will say," she pleaded. "Oh, no, Peter, I am sorry if any of them believe that I could be so cruel—but it's what you think—wofully. How can you?"

"I didn't say I did," he denied blantly. "I said they might suggest would protect you against what the rest might think. That would be the only reason I might enter the thing, for a blind."

He believed that he had done this cruel thing to him, and still wanted to protect her from the opinions of others. What confoundment men were, to be sure. Well, if he wanted to go to no noble, let him. She was positive that his entering the group would be to his honor and credit.

Which was what he agreed to do in the end. When Camilla left him to go to the office, he had promised to carve the words, "Land of Hope," on the plinth beneath the little group, and enter it in the National exhibit as if that had been his first intention.

FALSETEETH
DAWNET'S POWDER

Dr. Wernet's Powder holds false teeth so firmly and comfortably in place for 24 hours—they actually feel natural—eat, laugh, sing without fear of any slipping. Prescribed by world's most eminent dentists—they know it's the best—just sprinkle on. Inexpensive—any drugstore.

important enough to consider for entry in the exhibit. With the revival of his hopes, Avis glimpsed a faint possibility for her own, and immediately sponsored the new idea. She insisted upon serving him a hearty breakfast and then driving him to the museum with the piece of sculpture.

"Do you think I would take a chance on your tripping with your last and only hope, and 'breaking that'?" she attempted to jest. He was doing this thing more for Camilla's sake than anything. Just why, he did not know. Perhaps in memory of those first hours they had together when life and love had lavishly promised them so much, and there had been no thought of doubt and misunderstanding.

As Peter had predicted, there were more entrants than usual. Improvised students competed for that privilege which would solve so many past difficulties for them, as well as others who sought the distinction and various advantages which the winning of such a prize would tender them. And as he had expected, the figures in innumerable symbolic poses predominated. In fact, there were few who had ventured anything else.

There were a number of weird contortions after the modern, vogue, a few busts of prominent or historic characters, some animal and bird presentations. Fountains and garden pieces constituted the artistic majority, and Peter wished mightily that his youthful figure was added to their number. He might have had a chance, then. It had been good-better than many of them, and he believed it might have compared with the best of them.

He obstinately declined to accept Avis' suggestion that they pass the afternoon at a malinee, or do something to take his mind from his work, and wandered about aimlessly for awhile before he returned to the studio and the suspense of awaiting the outcome. That suspense did not take him so much, now, but he was anxious to know whom his own misfortune might have favored.

(To Be Continued)

Have Seagod For Pet

Boys In St. John, N.B., Planning To Teach Him Tricks

Two boys who caught a seagod on the Bay of Fundy about at West Saint John, New Brunswick, are wondering if it is really a white elephant. The young amphibian knows when to expect food, and three times a day, just before meal hour, he starts the neighborhood with strange faking. Then the boys have to go to his water, and he comes to him through a nipple on a baby's bottle.

After keeping the seagod in a garage for one day, the boys released it to the water, and watched it swim away. Early the next morning, however, it was waiting for them on the beach below their house and followed them home like an affectionate, although awkward dog. Sometimes it goes swimming, but he follows the family rowboat, but never descends its new pals.

The friendly canine, which enjoys frequent baths in a tub near the garage, is about three feet long and has a head resembling the ordinary dog. Dragging the hind flippers, it can walk almost as fast as its human companions. Since the pet refuses to go away, the boys are planning to teach him tricks.

A preacher in New Jersey, as he preached his large congregation on Easter Sunday morning, said: "I realize that there are many here who will not be with us again until next Easter time. I take this opportunity of wishing them a Merry Christmas."

The newest paper cups for picnics have handles.

Ask Mother—She Knows

Mother took this medicine before and after the babies came. It gave her more strength and energy when she was nervous and rundown. It kept her on the job all through the Change. No wonder she recommends it.

LYDIA E. PINKHAM'S VEGETABLE COMPOUND

A Marvel Of Architecture

Palace Of Arts In Mexico City Cost Ten Million Dollars

Many people look upon Mexicans as a somewhat barbaric people. Like Soviet Russia it is a country of periodic disturbances, but, like the Russians, they are intensely devoted to art, music and the theatre, and in the cities there is a far higher level of culture than in almost any English-speaking country. After 30 years, the Palace of Arts in Mexico City has just been completed. The building was begun in 1904 during the regime of Porfirio Diaz, and despite frequent political changes since succeeding governments have continued the work. There was never any difference of opinion about that. The Palace of Arts is a stupendous structure, housing art galleries, a national museum, a gigantic theatre which is a work of art in itself, and a concert hall.

The most wonderful lighting system ever conceived, an auditorium for concerts, rooms for exhibits, lectures and various other purposes. The building is a marvel of architecture in itself, and cost, two City blocks, and cost about \$10,000,000. Neither Great Britain, Canada nor the United States could or would duplicate such a monument to the arts.—St. Thomas Times-Journal.

Women Detectives Fail

To Be Disbanded In London After Six Months' Trial

Women detectives are a failure. Given a six months' trial in detective work, women members of the London police force have brought little beyond their inborn intuitive instinct to their work.

According to the Policewoman's Review they have been found wanting in sundry other capacities needed in this type of police work, and are to be disbanded.

In an outspoken editorial on their failure, the Review states: "Many women who wish to qualify as detectives are always quite certain of their personal capacity and are often unwilling to admit the absolute necessity of training to aid their instincts."

"The average woman is by nature entirely opposed to detective work and we see in this choice a safeguard to herself and a guarantee of her contribution to police work must be along different lines to those of men."

"We find ourselves unable to consider the disbanding of the women detectives as disastrous."

THE RHYMING OPTIMIST

By Aline Michaelis

NEW POETS

We know the songs old poets all have made,
How they have painted life's divinest shade
In words so splendid, now words are
As shade
To sun as feet to soaring wings.
We know how futile any phrase must be
Which cannot after perfect speech is said;
Our poems are as moths tossed out
While theirs are strong gulls wheeling overhead.

In spite of this, who can from song refrain
When it is passion of his every hour?
When through his veins is poured the life of man
Who can keep silence and renounce his power?
We know old poets sang sublimely well,
Yet each new heart has its own tale to tell!

More British Films

English Film Industry Has Greatly Increased Output

The British film industry has quadrupled its production in the past few years, it was revealed recently, and the report pointed out that the quality of the films has led England's movie houses to show twice as many British films as the best required. The "boom" in English films has led to a production of an average of 10 films per week, or some 200 for 1934, if the present pace is maintained, as against the former annual averages of 50 to 60.

In Canada the distillery industry provides the largest industrial outlet for surplus rye. Small amounts are used for human food products while a considerable proportion is fed or otherwise consumed on farms. Under the hog grading regulations, no carcass grading is authorized at an abattoir until scales and equipment for grading have been approved by the Dominion Minister of Agriculture.

Almost Instant Relief From Neuralgia

1. I'VE GOT TO GET A TAXI AND GO HOME. I'VE DEVELOPED AN ATTACK OF NEURALGIA.

2. 20 MINUTES LATER — IT'S WONDERFUL! HOW QUICKLY MY NEURALGIA WENT! THAT ASPIRIN CERTAINLY WORKS FAST.

3. YES, IT'S WONDERFUL!

For Quick Relief Say ASPIRIN When You Buy

Now comes amazingly quick relief from headaches, rheumatism, neuritis, neuralgia, the fastest safe relief. These results are due to a scientific discovery by which an Aspirin Tablet begins to dissolve, or disintegrate, in the amazing space of two seconds after touching moisture. And hence start "taking hold" of pain a few minutes after taking. The illustration of the glass, here, tells the story. An Aspirin Tablet starts to disintegrate almost instantly you swallow it. And thus is ready to go to work almost instantly. When you buy, though, be on guard against substitutes. To be sure you get ASPIRIN's quick relief, be sure the name Bayer in the form of a cross is of every tablet of Aspirin.

WHY ASPIRIN WORKS SO FAST
Drop an Aspirin Tablet into a glass of water. Note that BEFORE it touches bottom, it has started to disintegrate. What it does in the glass it does in your stomach. Hence its fast action.

MADE IN CANADA

Does Not Harm the Heart

Prairie Fruit Orchards

Scientific Fruit Breeding Of Great Assistance To West

The scientists coming to the aid of the prairie settler in enlarging the variety and increasing the volume of home-grown fruits for his table. The work of the scientist in other fields of agricultural production is, of course, already widely recognized. Marquis wheat, originated by Dr. Saunders at the Canadian Government Experimental Farm at Ottawa, which combined adaptation to a short season with high milling qualities, has literally rolled the map of agricultural areas northward. More recent scientific achievements seem likely to make the wheat scourge known as rust. While these and similar developments have occupied public attention, persistent and successful work has been carried on in adapting or creating varieties of fruit suitable to the prairie soil and climate. It is now predicted that if scientific fruit breeding continues at the present rate of progress, within the next twenty years the Western prairies will have a range of fruits approximately equal in quality to those now grown in the principal fruit-growing areas of Canada.

In their natural condition the Canadian prairies produce wild fruits in considerable variety. The delicious strawberry is native to very large areas. Raspberries, gooseberries, currants, cranberries, salberries and plums grow wild in many localities. Apples were introduced many years ago and varieties have been developed which do well under prairie conditions. Already a farmer who can grow wheat can have a considerable variety of fruit, and with scientific fruit breeding it is predicted that this variety will be increased.

Trophy In Dublin Museum

One Of Last Scalps Taken By Manitoba Sarscoe

A black tuft of hair lifted from the head of a Gros Ventres warrior by a Sarscoe Indian brave and one of the last scalps taken by Manitoba's dusky aborigines, rests under a glass case in the Dublin museum to-day, a concrete reminder to Irishmen that the Canadian West was once wild and wooded.

First Weather Forecast

Admiral Fitzroy Evolved System Seventy-Three Years Ago

The first official storm warning was printed by daily papers about seventy-three years ago. And how the seafarers scorned when it proved accurate! The official responsible for such a daring commitment was Admiral Fitzroy, who, as first director of the Meteorological Department, then under the control of Board of Trade, deserves to be remembered as the father of the weather forecast.

He evolved the system of collecting and collating reports from a number of scattered sources. Whereas the modern forecaster is kept in touch with conditions all over the world, he received but five reports from abroad, and these were usually a day or two late! Fitzroy came to an untimely end; overwork drove him to suicide in April, 1865. He left behind him a mass of valuable data on weather observations at sea.

Deadly snake venom has been found useful in the treatment of several diseases.

Mentally, some men and women never grow old, no matter how many years they have to their credit.

HEAVY PARA-SANI WAXED PAPER Get the Green box. Keep it in your kitchen always. Inexpensive.

Maplewood PAPER REQUESTS
HAMILTON, ONTARIO

What is a Bargain?

In this community are hundreds of individuals and families on the watch for an advertisement which will offer them what they want at an advantageous price.

Call them bargain-hunters if you will, but thrifty shoppers would be the better designation. Thrift is a commendable trait and merchants should cater to it.

One family wants a new carpet—the need is not urgent. Another family is looking forward to buying dining-room furniture—it may not be for a twelve month.

One man is thinking of buying himself a watch. One woman a shopping bag; another an umbrella.

All can be made to buy earlier—by advertising. Advertising can make the desire so keen that the bargain is forgotten in the fever for immediate possession.

A NOTE TO MERCHANTS

Stimulate business by the offer of some slow-moving lines of special prices. Brighten up business by advertising some desirable goods at reduced prices. Make advertising banish dull business. Often you can tempt the buyer who is biding his or her time, to buy from you—at a time of your naming.

FIGHTING SWEATED LABOR

Home work for ten thousand women and children was officially ended in New York the other day when embroidery work was removed from the home to the factory, under the code for fair competition for the pleating, stitching and hand-embroidery industry. "This is an historic event in the fight against sweated work and under cover child labor," said M. Axelsson, director of the Code Authority. "Wages of thirty-five cents an hour must be paid in the factory instead of old home rates which usually run less than ten cents an hour, and children cannot work there as they could when hidden in the homes." There has been some difficulty about enforcing home-work regulations in codes, due to the sentiment against depriving physically incapacitated and bedridden people of the right to do work in the homes. This obstacle has now been removed by President Roosevelt's executive order of May 16th, which exempts physically incapacitated persons and persons who must stay at home to attend bedridden and invalid people. Home work in connection with the men's clothing industry was abolished some months ago. These were much needed reforms and will serve as a fine example to industrial reformers beyond Uncle Sam's borders.

The New Outlook.

A lad named Harper, of Calgary, has decided to enter the five-mile road race in Blairmore on July 2nd.

Rumor has it that both Coleman and Ferris have decided to cancel their proposed sports programmes for July 2nd.

In most of the town school districts of Alberta, teachers have been asked to remain another term at same salaries.

Capt. Abraham Kean, veteran Newfoundland sea-hunter, was remembered in His Majesty's birthday honors, by having the O.B.E. conferred upon him.

District News
From Our Own Correspondents

BELLEVUE HAPPENINGS

The Bellevue students, who have been attending normal school, are all home, glad that they are now in the market for schools.

A shower in honor of a bride-elect of this month, Miss Ann Penman, was given at the home of Mrs. J. H. McLean on Saturday, when sixty of her friends assembled. Bridge was played the early part of the evening, with twelve tables in play. A dainty supper was served at midnight by the hostess of the evening, Mrs. McLean, assisted by Mrs. Foster and Mrs. Peake (of Lethbridge). The party broke up about 1 a.m.

C. Emmerson was a visitor to Edmonton last week, returning Saturday.

The baseball game on Friday, between Coleman and Bellevue, resulted in a win for the locals by 9-8.

Several Bellevue men were taken up to Blairmore on Saturday night to cool off, after being found creating a disturbance on main street.

Mr. and Mrs. Peake, junior, and Mr. and Mrs. Peake, senior, of Lethbridge, were week end visitors at the home of Mrs. Foster.

Mrs. Padgett, of Calgary, Chasteline agent, arrived here this week and is guest of Mr. and Mrs. Cranston.

The second win for the Bellevue baseball team this week was at the expense of Hillcrest, the score being 11-4 for Bellevue.

The Douglas Social Credit meeting here on Wednesday was well attended. The system was very well outlined by Messrs. Unwin and Rogers, of Calgary. A study group was formed to carry on the work of the system here.

Mr. and Mrs. A. Watson, of Fresno, California, are visiting for a few days with Mr. and Mrs. A. Watson, senior, here.

INTERESTING RESOLUTIONS SUBMITTED TO RECENT SESSION OF PARLIAMENT

(Continued from last week)

Whereas the Naturalization Act requires the applicant for naturalization to prove five years' residence in His Majesty's Dominions, of which only the one year preceding the date of his petition must be in Canada, and he is required to declare his intention to reside after naturalization in His Majesty's Dominions, but not necessarily in Canada; and

Whereas the effect of naturalization under said Act is to make persons British subjects and not Canadian citizens;

Be It Resolved that the Oath of Allegiance should in all cases be altered or extended so as to require patriotism and devotion to Canada and the Canadian nation; and

Be It Further Resolved that the residence required by the Naturalization Act for the purpose of naturalization be residence in Canada and

HILLCREST HAPPENINGS

Mrs. E. Stutchberry, of Lethbridge, was a visitor at the home of Mrs. A. Wyatt last week.

Mrs. E. Rhys, accompanied by Mrs. D. Davies and Mr. and Mrs. A. Rhys, motored to Calgary last week end.

A son was born to Mr. and Mrs. Hollinbeck last Wednesday.

The Hillcrest baseball team defeated Blairmore at that town 10-4.

J. Edwards is holidaying in Vancouver.

S. Richards is confined to his home with a badly sprained ankle.

Mr. and Mrs. J. Gorton, junior, were visitors to Calgary last week.

A strawberry tea was held in the church on Saturday afternoon, under auspices of the Ladies' Aid.

The marriage took place at Bellevue on Sunday morning of Miss Jennie Makin, younger daughter of Mr. and Mrs. J. W. Makin, to Norman, only son of Mr. and Mrs. Gilbert Miller, Rev. John Wood officiating. The bride was attired in a grey suit with white accessories. The happy couple left after the ceremony for Banff, where they will spend their honeymoon. On their return, they will make their home in Hillcrest.

The Coleman baseball team defeated Hillcrest 5-1 on Monday.

Mr. and Mrs. W. Rogers were speakers at the Douglas meeting here on Monday evening. G. E. Crickshank, M.L.A., acted as chairman. A violin solo was rendered by Miss Jean Crickshank, and a piano solo by Mr. T. Beynon.

that the declaration of Intention be a declaration of intention to reside in Canada after naturalization is granted; and

Be It Further Resolved that the Oath of Allegiance required by the Oaths of Allegiance Act be altered to read as follows: "I, A.B., do solemnly promise and swear that I will be faithful and bear true allegiance to His Majesty King George V. of Canada..." and

Be It Further Resolved that the Oath of Allegiance required by the Naturalization Act be altered to read as follows: "I, A.B., swear by Almighty God that I will be faithful and bear true allegiance to His Majesty King George V. of Canada, his heirs and successors according to law. So help me God."

Whereas we feel that a special day should be set apart to celebrate the anniversary of the passing of the Statute of Westminster, we, therefore, recommend that December 11th be made one of Canada's National Days;

Whereas we believe that it is essential in the interests of the welfare of Canada that the Civil Service of Canada should be Canadian in its thought and outlook; and

Whereas we believe that those born outside of Canada should not have employment in the Civil Service of Canada in a greater proportion than they bear to the population of Canada; and

Whereas we believe that, at the present time, at least 40% of the Civil Servants of Canada were born outside of Canada;

Therefore Be It Resolved that we recommend that, in the interests of the Civil Service of Canada and of Canada, preference be given to the Canadian-born in all appointments to the Civil Service.

We again have the honor to present our recommendation in regard to the Banking System of Canada;

"Whereas we believe that the banking system of Canada should be such as to assist in the return of prosperity to Canada; and

"Whereas we believe that the banking system of Canada should be such as to safeguard the sovereignty of our Canadian Parliament;

Now Therefore Be It Resolved that the Government of Canada be urged to pass an Act creating a Central Bank of Canada which will in no way delegate to the directorate of any privately-owned financial institution the powers, or any part of them, as specially enumerated in the B.N.A. Act as belonging to the Federal Parliament of Canada;

Be It Further Resolved that we recommend that the sole control of money and credit as a commodity in Canada should be in the hands of the Federal Government, to guarantee prices under fluctuating economic conditions and insure purchasing power in the hands of the consumer;

Be It Further Resolved that we recommend that a system of government supervision and inspection of banks be devised."

The Native Sons of Canada feel that direction should be given by the Dominion Government, in connection with the distribution of relief and the general policy adopted in that connection, and we, therefore, present the following resolution:

Whereas no benefit is accruing from money spent for direct relief; and

Whereas idleness is morally fatal to individuals; and

Whereas a generation of boys is growing up for whom no work can be found; and

Therefore Be It Resolved that the Native Sons of Canada request the Federal and Provincial Governments and municipal bodies to supply work

in exchange for the relief given to them wherever possible and that, in this connection, the fair wage principle be recognized."

In view of the necessity of a complete Canadian Shipping Act, we recommend the following:

Whereas in the two decades following Confederation and for long before, Canada had a large fleet of merchant ships and a large proportion of its citizens were well trained and efficient seamen; and

Whereas all other nations reserve their coastal trade to their own citizens and ships; and

Whereas most nations do by subsidies to and duties upon ships and pensions to seamen, strive greatly to develop a Mercantile Marine; and

Whereas the carrying trade on sea is a service which brings large rewards and develops highly desirable skill and character, and any maritime nation which abandons seamanhood and shipping relinquishes thereby a great source of revenue and an occupation nationally requisite for its citizens; and

Whereas the Canada Shipping Act in part passed by the late session of Parliament, and further intended to be passed at a future session, not only blots out the name of "Canadian Ships," but abstains from all provisions protecting or encouraging Canadian shipping and seamen and resigns the coastal trade to British ships;

Therefore Be It Resolved that, by our statutes and policy;

(a) Canadian ships be defined and recognized as Canadian ships;

(b) The coastal trade of Canada be reserved to Canadian ships manned by Canadian crews;

(c) Canadian subsidies be granted only to Canadian ships manned by Canadian crews and which have their repairs done and their supplies purchased in Canada;

(d) That Canadian shipbuilding be promoted;

(e) Canadians be encouraged to follow the occupation of seamen, even to the extent of granting a pension after a certain number of years' service; and

(f) Active and decided measures be generally taken to insure that Canada shall prosper by sea as well as by land.

We believe that the question of the

manufacture of armaments is of major importance in regard to the peace of Canada and of the world. We, therefore, present the following resolution:

Whereas the present system that internationally maintains in respect of the control of the making of armaments is conducive to monopoly; and

Whereas armaments are essentially a part of national requirements, defensive or offensive; and

Whereas the present private monopoly of the production and distribution of armaments is an incentive to stir up strife and wars between nations for the personal aggrandizement of a few already over-wealthy magnates; and

Whereas a nation called upon to defend its honor and good name is compelled to secure armaments at an exorbitant price, when forced into war; and

Whereas it is only meet and just that the manhood that is prepared to make final sacrifice when consuming these armaments should be repaid equally with the makers of the armaments; and

Whereas the taxpayers would be relieved of years of stinting to pay off war debts accumulated by the purchase of armaments from private manufacturers;

Be It Resolved that the National Council of the Native Sons of Canada do hereby request the Parliament of Canada to enact such legislation as will bring the manufacture, control, sale, distribution of armaments of all kinds and descriptions under the sole jurisdiction of some branch of the Canadian Government; and

Be It Further Resolved that armaments be construed to include all forms of explosives, gases, and other devices for using these, whether they be small or large.

Be It Finally Resolved that, in view of the fact that it is essential for the peace and harmony of mankind that armaments be under national control, that this resolution be energetically pressed until effective.

(Continued next week)

Sarah, the teacher, was giving a lesson about animals, but Cecilia was not listening, so she asked him: "What's the use of reindeer?"

"To make the flowers grow."

"To make the flowers grow."

"To make the flowers grow."

"To make the flowers grow."

War Debt Revision Looms

Great Britain's action in deferring payment of the \$261,734,000 instalment due the United States on June 15, has thrown the whole war debt problem again prominently into the field of international controversy. It poses the United States government with the inescapable necessity of initiating discussions preliminary to a complete review of the war debt situation. It forces a showdown.

Great Britain, of course, will not be satisfied with a mere review. It wants revision of the terms of settlement—revision drastically downward. It wants as much consideration from its creditor, as it (a creditor) has given its debtors. At the very worst, it seeks as generous treatment, on principal and interest, as was given France and other countries by the United States.

In falling to make even a so-called "token" payment on the instalment due June 15, Great Britain informed the United States that the terms of the agreement between the two countries in respect of war debts imposed "a burden which was both unreasonable and inequitable in relation to other countries." The facts justify this statement. Whether intentionally or not, Britain has been adversely discriminated against.

Great Britain, according to the records, borrowed \$4,277,000,000 from the United States, a large percentage of which was for its own use, but on behalf of allied countries during the war. The money was spent in the United States for war material and was the real foundation of the extremely high wages paid munition workers in that country during the war. Since the Baldwin agreement which fixed the terms and conditions of repaying the war loans, Great Britain has made instalment payments aggregating \$2,025,000,000. Because of the high comparative interest rate paid by Britain, however, London is still indebted to Washington in the sum of \$4,742,785,000. That is to say, after paying back more than two billion dollars, Britain still owes more than the original debt.

Obviously, the situation clamors for reasonable adjustment from that aspect alone. There are other, equally cogent, reasons why revision should be made. There are irrefutable arguments why the debt problem should be solved finally and amicably. That war debts should remain a subject of international controversy, cropping up periodically to stir prejudices and animosities, is a reflection upon the intelligence of the two great English-speaking nations towards whom the world looks for preservation of concord among the countries of the world.

Great Britain's agreement to pay instalments in the amount of approximately \$262,000,000 was predicated, in the first place, upon expectations of a similar amount being paid by France and other European countries in respect of war debts due London. Britain lent more than she borrowed. In order to avoid financial and economic chaos, however, the British government decided to suspend all claims against debtor nations for payments on war debts, and takes the position now that, if it must pay the United States in full, it must exact payment of a corresponding amount from its own war debtors. The position is quite understandable and undoubtedly reasonable.

"Such procedure," said the British note to Washington, "would throw a bombshell into the European arena which would have financial and economic repercussions over all five continents, and would postpone indefinitely the chances of world recovery."

Consequently, Britain politely suggests the United States should do its bit "to speed world recovery by recognizing the realities of the situation and revising present agreements on a payable basis." The question is not that Great Britain is anxious to escape payment of its indebtedness. Suggestions have emanated from London, from time to time, for liquidation of the entire obligation by lump sum payments. Washington has not viewed this suggestion favorably, heretofore. In fact, an insipid position has been taken by some of the most vocal of American legislators who take the "pound of flesh" viewpoint. Furthermore, Britain's failure to make even a payment on account—the "token" payments such as were made in June and December 1933—has been attributed to the Johnson Act, passed this year, which specified that any nation not making payment in full on the due date, would be considered as in default.

The British note is couched in language which the people of Western Canada will appreciate and approve. It strikes a manly note of independence and forthrightness. When declaring that payment would be deferred until "it becomes possible to discuss an ultimate settlement of inter-governmental war debts with a reasonable prospect of agreement" the note asserts the British government has no intention of repudiating its obligations.

Japanese Trade Invasion

New Penetrating Traditional United States Markets

Japan's steady successful invasion of traditional United States export markets was disclosed in the department of commerce annual world economic review for 1933. The report showed larger Japanese shipments of competitive articles to the United States, big export increases to Latin America, a Japanese victory over American manufacturers in the battle for the Philippine textile trade, and increasing sales in Europe, Africa and elsewhere.

Grandma was helping Peggy make out a list of little guests for her holiday party. "How about the Morton twins?" grandma asked. "Well, there's no need to ask them both," Peggy answered, "they're exactly alike."

Few People Escape Attacks Of Summer Complaint

Summer Complaint may be slight, or it may be serious, but you can't tell when it seizes you how it may end. Allow the profuse diarrhoea, the vomiting and purging to continue for a day or two, and you may become weak and prostrated. Just as soon as you feel any looseness of the bowels go at once to your drugstore and get a bottle of Dr. Fowler's Extract of Wild Strawberry and check this unsatisfactory action before the weakening looseness can get started. Don't experiment. Get "Dr. Fowler's." It has been on the market for 88 years.

Making China Seas Safe

Marine Department Continues Work To Provide Guidance For Ships

Typoons do not tell the whole story of the China Seas. Far more assailable the shipping on the Chinese coast at almost any time, and almost independent of the typhoon are the frequent. The coast itself is a dangerous and the sea of its tides, as treacherous as any in the world. Casual islands and shoals demand the utmost vigilance. And the domain which runs Chinese junk is not to make matters of the ancient craft of navigation.

The lighting of the China coast is not a century old. The National Lightship Service was founded about the middle of the nineteenth century by Sir Robert Hart, who was authorized by the government of the day to start a system of lighting for the benefit of navigation. Sir Robert possessed himself of a first-class expert, and he and his handful of foreigners established the nucleus of a service which, in the Chinese Maritime Customs, now provides guidance not only to ships at sea but to the coastal craft navigating the river of China and in particular the Yangtze.

The romance of the Marine Department of the Chinese Maritime Customs has yet to be written. This organization, organized by Sir Robert Hart and his devoted helpers, has developed unobtrusively, and its traditions and efficiency have been maintained by successive Inspectors-General.

For the last five years or so bandits have waylaid the staff engaged in marking out channels for navigation. They have removed beacons and buoys—which have been promptly restored—and have subjected the Customs launches to such atrocious malignance that those craft now have to be protected by metal plates and shut up like sardine tins. Near Anking, the capital of Anhui, where is a Christmas Island, a favorite spot for the bandits in the Lower Yangtze. Twelve robberies of lightships or lightboats occurred there in 1931.

But the work proceeds, the course is kept open. The Tungting Lake has been lately surveyed. Improved charts have been established, and the River Inspectorate has added to its store of knowledge and given it to the river public in thousands of notices.

Flag Made By Prisoners

Union Jack Secretly Made In German Camp During War

Made in a German camp during the World War, a British Union Jack was used during the unveiling recently of a memorial in Manchester, England. Dr. Petty Officer James Allen, who brought the flag home, said it was made by prisoners in Sprottau, Silesia. "A Russian, who was allowed out," he said, "used to mangle in a little bit of cloth at a time, and in the tailor's shop another Russian secretly made it up to the instructions of the British. We produced it first at the funeral of one of the British prisoners, and in all it was used on 21 such occasions. Only once did the Germans show any objection. The flag was drying on the wall, and when an inspection officer saw it he stopped, snarled, 'Shweinhunde', and passed on. Each member of his staff did likewise."

Animals As Witnesses

Were Used In Sardania Until Few Years Ago

Animals were used as court witnesses in Sardania up to a few years ago. When a solitary householder was killed an alleged burglar he was brought to trial and made to swear that the homicide was justifiable. The oath was taken before one big dog, cats or birds that witnessed the killing. If the animal did not manifest some contradictory sign the prisoner was set free.

Buried On Rifle Range

Cot. John Hopkin, a famous Canadian hero who is well known to rifle men and other overseas marksmen who have competed at Bisley, was buried in accordance with his expressed wish, at the firing point of the 1,500 yards range on his own estate, in Hertfordshire. He had completed a Bisley Empire meet for 36 years.

Are Unknown Specimens

Three crabs, flies, collected by King Leopold of Belgium, were received at Amberst College for classification at Dr. Charles P. Alexander, professor of entomology. The flies, unknown specimens of Tipulidae, are long-legged and slender, resembling

Tennis became a sport more than 700 years ago, and in its beginning it was an indoor game and has been "lawn tennis" only since 1874.

Zoo Fatality

Lions In Cage Kill Victim As Horrified Spectators Watch

While a crowd of horrified spectators looked on, four lions in an open-air zoo at Whitenape, Eng., killed a zoo employee who had gone into their cage to recover a visitor's hat.

The owner of the hat and several other persons who tried to save the victim, Stanley Lewis Stenson, were driven back by the lions, two of which were eventually killed by keepers before they could recover Stenson's body.

Stenson, employed in the catering department of the zoo, apparently decided suddenly to attempt to retrieve the hat and went into the enclosure between the outer barrier and the railing surrounding the pit in which the lions are kept.

As he crawled along the top of the inside railing, two of the lions reached through the bars and began mauling him.

Stenson was unable to get away from the lions' claws and several spectators went into the place to try to pull him away, but were not successful as the two other lions joined in the attack through the bars.

Stenson then fell into the pit, striking his head on the concrete about 16 feet below. The lions dragged him further into the pit and killed him with the horrible screams and screams and several women fainted.

The keepers had to shoot two of the lions before they were able to drive the others into their cages at the far end of the pit.

Recipes For This Week

(By Betty Barclay)

HOT MILK SPONGE CAKE

(4 eggs)
1 cup sifted cake flour
1 teaspoon combination baking powder
1/4 teaspoon salt
3 eggs
1 cup sugar
2 teaspoons lemon juice
6 tablespoons hot milk

Sift flour once, measure, add baking powder, salt, and sift together three times. Beat eggs until very thick and light and nearly white (10 minutes). Add sugar gradually, beating constantly. Add lemon juice. Fold in flour, a small amount at a time. Add milk, mixing quickly until batter is smooth. Turn at once into ungreased tube pan and bake in moderate oven (350 degrees F.) 35 minutes, or until done. Remove from oven and invert pan 1 hour, or until cool.

This mixture may be baked in two lightly greased 8x3-1/2 inch pans in moderate oven (350 degrees F.) 25 minutes; or in 12x3-1/2 inch loaf pan in moderate oven (350 degrees F.) 35 minutes. Or turn mixture in 96 small cup cake pans, which have been greased very lightly on bottoms, and bake in moderate oven (350 degrees F.) 20 minutes, or until done.

PEANUT BUTTER HERMITS

1/2 cup sweetened condensed milk
6 tablespoons peanut butter
1/4 teaspoon salt
1/2 cup granular cracker crumbs
Thoroughly blend together the sweetened condensed milk and peanut butter. Add salt and granular cracker crumbs. Mix well. Drop by spoonfuls on a buttered baking sheet. Bake 15 minutes, or until brown, in a moderately hot oven (375 degrees F.). This recipe makes 1 1/2 dozen.

Girl Castaway—Good Heavens!

Castaway—Good Heavens! Sailor—Now, now, don't get in a stew.

THAT DEPRESSED FEELING IS LARGELY LIVER

Wake up your Liver Bile

Without Calomel
You are "feeling lousy" simply because your liver is sluggish. It is the liver that filters out the poisons from the blood and sends them out of the body. If the liver is sluggish, the poisons build up in the blood, and you feel lousy. Calomel is a powerful liver stimulant. It wakes up the liver, and the liver filters out the poisons from the blood, and you feel better. Calomel is a powerful liver stimulant. It wakes up the liver, and the liver filters out the poisons from the blood, and you feel better.

Test Route To Arctic Posts

Ready To Ship Supplies From Edmonton To Ship Supplies From Edmonton

Testing out the Mackenzie river route, the Hudson's Bay Company will ship 500 tons of supplies from Edmonton this season for its posts in the western Arctic region, according to Col. H. G. Hall, manager of the H.B. transport department in the north.

The shipments will be moved as easily as possible down the Mackenzie river to Tuktoyaktuk harbor, on the Arctic coast, east of Akavik.

At that point, the supplies will be loaded on a distributing vessel to be carried to posts in the Cambridge Bay, King William Island and other parts of the western Arctic.

It is planned to start the distributing vessel on this trip by August 15, so as to give it time to complete its Arctic voyage and return to port before freeze-up.

From the standpoint of Edmonton and the northern route, this year's experiments are of importance as successful results will mean that in future the supplies will be moved northward from this city.

Several years ago, a steamer Bay-Chimo was frozen in and abandoned when carrying the season's supplies for northern posts round by way of the Pacific and Bering strait to the Arctic coast.

The route was used successfully the next year, however, but last year there was another failure and supplies had to be rushed north by way of Edmonton and the Mackenzie river to Akavik.

"The route from Vancouver through Bering strait is uncertain," said Col. Hall. "We think the Mackenzie river is more certain and for that reason are making this first experiment this year."

The difficulty of the Mackenzie route in the past had been to find a suitable trans-shipment point where the distributing vessel could meet the river boat, Col. Hall explained.

Due to sandbars at the mouth of the river, it obviously was difficult to bring a deep sea vessel into shallow water, while at the same time a river boat could not be navigated on the ocean, he said.

Last year, the Dominion government had co-operated with the company in making a survey of the Mackenzie river delta. The reports of that survey gave reasonable prospects of Tuktoyaktuk harbor being a suitable point at which the vessels could meet.

Native Son Of Juland

Danes Setting Up Memorial Stone To Shakespeare's Hamlet

The Danes of Juland have made clear their position—what they claim Shakespeare's hero, Hamlet, as a native son of Juland—by setting up a memorial stone on the battlefield where he is said to have fallen. Some years ago a hotel-keeper in Elsinore, in eastern Denmark, labelled a local grub as "Hamlet's grave." The Danes, who knew their ancient history, Denmark's oldest historian, who lived about 1200 A.D., declared that Hamlet after being crowned king fell in battle on Ammelheide, or Hamlet's Heath, and was buried somewhere on the field.

The stone has been placed on a Viking mound in the field, though it is emphasized that the exact spot where the king was buried is entirely unknown. An excavation of the Viking mound failed to reveal any sign of burial. The inscription on the stone is translated as follows: "Amled, wisest of all in Viking days, played the fool until the hour of revenge. Hailed as king by the Jutes, he rests on Ammel Heide."

Working To Lift Debt

Farmer Members In Prairie Town Show Loyalty To Church

An illustration of the grip of the Church upon the localities of the people of prairie Canada would seem to lie in a news item from a Saskatchewan hamlet.

There is a debt on this church of \$2,000—little cash in sight with which to pay it. But the church and its farmer supporters have decided to see what can be done. The church has obtained temporary possession of 50 acres of land in the territory it serves and this has been decided to be used for farming, supplying the seed and performing the labor.

What cash proceeds this wheat will yield will be applied on the church debt. And all the farmer members and adherents of the church will get under a certain portion of their own lands as a "church debt" area. These tracts have been secured, and what is realized will be turned over to the church—Regina Leader-Post.

Germany ranks first in the number of motorcycles owned and operated.

Feels 50lbs. Slimmer

After Lotion Only 50 lbs.

"I started feeling lousy with constipation and mouth sore," says Mrs. W. J. Kruschke. "I have lost 50 lbs. in weight, and feel like a new woman. I am a housewife and worried over 100 lbs. weight. But I found Kruschke's 'Lotion' and thanks to Kruschke's 'Lotion' I feel like a new woman. I am a housewife and worried over 100 lbs. weight. But I found Kruschke's 'Lotion' and thanks to Kruschke's 'Lotion' I feel like a new woman."

Invents New Material

Belgian Major Says It Will Make Airplanes Fireproof

Major Van de Bollenhe of the Belgian Army declares he has invented a material which will make airplanes fireproof. The material is made of a mixture of three chemical baths and then baked at high temperatures. Tests were made recently near Brussels. To demonstrate its value documents were put into two boxes made of the material. One box was set on fire and the other was plunged into a blazing fire for a quarter of an hour. The papers received no injury whatever. A miniature airplane was also covered in gasoline and ignited. The flames burned themselves out without any injury to the plane. To show his confidence the major sat for 10 minutes in the pilot's seat with the plane blazing all round him. The temperature in the cabin never rose above 74 degrees.

Shined Shoes Of Prince

Veteran Bootblack Had Many Experiences In Fifty Years

Hardy Bent, of Digby, Nova Scotia, veteran bootblack, once shined the shoes of the late King Edward VII, who was then Prince of Wales, and a visitor in Toronto. He will celebrate his 78th birthday in July.

A master of his trade with more than 50 years' experience, he has put up his "old stand" in the same place for the past 35 years. When he was younger he travelled, and shoes to which he applied polish and brush were the pride of their owners in New York, Toronto, Halifax, Saint John, and many other cities. "Hardy Peg," as he is called, says that he has seen lean years, but looks forward to a bright future because he is drawing an old-age pension.

Movable Birthday Date

A Milwaukee man's sliding scale of birthdays brought dismissal of his application for an old age pension. He was listed as 45 in a life insurance policy, 58 in county relief records, 66 in his marriage papers, and 70 in his pension application. Severity is the minimum age for eligibility to a pension.

If it wasn't for the help of a woman most self-made men would be out of luck.

CLOSED VOTERS' LIST TO STAND FOR 12 MONTHS

Ottawa.—A closed voters' list that will stand for periods of 12 months and always be ready for immediate use, appointment of a franchise commissioner for all Canada and revising officers in each constituency, and machinery whereby a general election could be held within four weeks' notice, are objectives of the new Franchise Act discussed in the House of Commons.

Hon. Hugh Guthrie, minister of justice, moved the resolution on which the bill is based, described its objectives and deprecated efforts by some newspapers to give the impression that those unfamiliar with either French or English would be disfranchised. That had never been the intention of the government, he declared.

Prime Minister R. B. Bennett also regretted the use made by some portions of the press of advance information on the draft bill for the purpose mentioned by Mr. Guthrie and also to lead the public to believe the Doukhobors in Canada would be deprived of the vote. It was suggested that the Doukhobors in British Columbia, who had defied the laws, would be so treated. But that was a matter yet to be decided.

Members of the third group in parliament were incensed when it was revealed that the draft bill had been the subject of an informal conference between the members of the government, the leader of the opposition and one of his colleagues.

"One of the most disgraceful things ever known," said E. J. Garland (U.F.A., Bow River), in expressing his resentment that the third group had not been included in preliminary discussions. Robert Gardiner (U.F.A., Acadia) also expressed his belief that the government should have included his party in the conferences. The reply of both Mr. Bennett and Rt. Hon. W. L. Mackenzie King, opposition leader, was that the steps leading up to the preliminary discussions were taken in the house, and if the third group had wished to participate they could have expressed themselves at that time.

The resolution was passed after considerable debate, but no great opposition to the principles of the bill was advanced.

Briefly the bill proposes to make the following changes in the present regulations:

Appoint a franchise commissioner for all Canada.

Appoint revising officers in every constituency.

Appoint one or more enumerators in every polling district, to prepare for first list.

Immediate preparation by enumerators of a voters' list for all Canada, to be kept in print at Ottawa, and to stand for 12-month periods as a closed list.

List to be completely revised every 12 months.

Voters in urban districts to accompany registration with signed statement so that signature may be compared to obviate impersonation at the polls.

The list to be geographical rather than alphabetical, or both.

There is no change in the actual machinery of conducting an election and very little in the qualifications for franchise.

The main consideration being given to the list of voters.

With the proposed closed list a person who moved during the 12-month period would be entitled to vote only in the district in which he was registered at the time the list was closed.

Mr. King, while not opposing the measure, suggested that there should be two enumerators in each polling district, representative of the government party and the official opposition, and that there should be an appeal from the rulings of the revising officer. The draft act contemplates no appeal but Mr. King thought one should lie with a county court judge.

The prime minister expressed the opinion that these differences could easily be composed and prophesied that the bill, when finally presented, would contain few, if any, clauses which would prove objectionable to any party.

Bring Down Radium Ore

Edmonton.—Two Canadian Airways pilots brought down one ton of pitchblende (radium ore) from the rich claims of E. Hargreaves at Hotchkiss Lake to the end of steel at Waterton, Alta., during last week.

W. N. U. 2061

Three Indian Brothers Committed For Trial

Charged With Murder Of Two B.C. Police Officers

Merritt, B.C.—Trial of three Indian brothers, charged with the murder of Dominion Constable F. H. Gibson on the Canford Indian reserve on or about May 24, will open at the Vernon, B.C., assizes, June 26.

Emas, Richardson and Alex George were committed to trial by Magistrate A. G. Freeze and were removed to Okalla prison under heavy police guard.

A fourth brother accused of murder, Joseph George, was under medical care in Vancouver. He was granted a further remand until June 21.

Many bloodstained exhibits were introduced during the two-day preliminary hearing. Indian neighbors of the George brothers from reservation and expert police investigators testified for the crown.

A cheque for \$500, the reward offered by the British Columbia government for the recovery of one or both of the constables, will be turned over to "Big Frank," the Indian, who recovered Gibson's body from the Nicola river on May 26.

No pains have been spared by police in their efforts to avenge the alleged slaying of their comrades. Soon after the constables' disappearance, Attorney-General Gordon Ross announced "the entire resources of the crown" had been placed at the disposal of the investigators in their effort to obtain a conviction.

May Beat Previous Record

One Pullet Has Chance In Egg-Laying Contest

Agassiz, B.C.—Only one pullet in the annual egg-laying contest at the Dominion experimental farm here has a chance to equal or better the world's record of 357 eggs in 365 days, equalled in last year's contest by the White Leghorn, Derreen 10-L. Barred Rock pullet No. 3, owned by the Delta Land Company, Vancouver, has laid 220 eggs in 224 days to equal the performance of "Dauntless Derreen" at this time last year. Her closest competitor is Barred Rock pullet No. 2, owned by A. Pennington of Agassiz, with 212 eggs.

Pullet No. 3 has laid small eggs, however, and is far behind on points in the current contest with only 2017. Ranking No. 10, a White Leghorn, leads with 219.6 points, although she had laid only 200 eggs.

Heart Surgery Possible

Cleveland Surgeon Predicts Direct Operations In Near Future

Cleveland.—A new type of heart surgery, promising one avenue of escape from the present tremendous heart death rate, was proposed to the American Medical Association by Claude S. Beck, Cleveland surgeon. He pictured surgeons in the near future operating directly upon hearts. The hearts will be patched literally, he predicted, with grafts of tissue taken from other parts of the body.

Case For Federal Cabinet

Vancouver.—British Columbia's case for the taking over of the Pacific Great Eastern Railway by the Dominion and her claims for better terms under confederation will probably be considered by a committee of the whole federal cabinet some time after prorogation of parliament, Premier T. D. Pattullo indicated.

Tourist Body Appointed

Committee Consists Of One Member From Each Province

Ottawa.—A permanent committee to deal with the tourist industry and co-operate with existing organizations developing tourist traffic, has been appointed by the senate.

The committee is appointed of nine members, one representing each province. The senators are: W. A. Buchanan, Alberta; W. H. Dennis, Nova Scotia; W. E. Foster, New Brunswick; R. F. Green, British Columbia; R. B. Horner, Saskatchewan; H. G. Hecken, Ontario; Greelmas MacArthur, Prince Edward Island; George Parent, Quebec, and W. H. Sharpe, Manitoba. Except for Senator Sharpe, the personnel of the committee is the same as that of the original special committee. Senator Sharpe was added to the standing committee in order to give representation to all provinces.

U.S. MAY ACCEPT PAYMENT IN KIND ON BRITISH DEBT

Washington.—Replying to the British war debts note of June 4, the United States government has suggested offers would be considered for readjusting the debt or payment in goods and services. Points set forth are:

1. Great Britain would have to pay only the amount of the June 15 instalment to avoid being considered in default under the Johnson law.

2. There is no connection whatever between the debt owed the United States by Great Britain and those owed Great Britain by other countries.

3. The United States government will be glad to entertain proposals for either readjustment of the debt or for payment in goods and services.

"The British government undertook to borrow under its own name and on its own credit standing, and repayment was not made contingent upon the fate of the debts due to the British government," the note said.

The suggestion for this manner of payments made in the note was declared not to be an offer for full payment on such a basis.

"Should His Majesty's government wish to put forward proposals for the resumption of payments, this government would be glad to entertain and discuss them informally."

"For instance, no proposal has ever been presented to this government looking towards payments in kind to an extent that might be found mutually practicable and agreeable."

"Any proposals of this or a similar character which promise mutual benefit will be carefully considered for eventual submission to the American congress."

Such commodities as tin, rubber, jade and silver immediately came to the minds of observers as they studied the note. The world's largest tin mines are largely controlled by Britain. Administration officials, apparently concerned over the United States supply, are lending support to congressional moves to retain present holdings and find a domestic source.

The British Empire is the world's largest producer of rubber of which the United States is the leading consumer.

Chicago.—Captain Maurice Rossi and Lieut. Paul Codas have arrived here from Montreal, to visit the world fair.

A HAPSBURG RETURNS TO VIENNA FROM EXILE

The first member of the royal house of Hapsburg to return to Austria from exile in 15 years, the Archduke Eugene (left), is shown in conference with Engelbert Dollfuss, Austrian dictator, soon after his arrival in Vienna. The Archduke had lived in Switzerland since the fall of the monarchy, when he refused to relinquish his imperial rights. He was greeted enthusiastically by people in Vienna.

SET NEW AIR MARK

Jean Batten, 24-year-old English girl, pictured just before she hopped off from London on her record flight to Australia. The daring ladybird lopped five days from the previous record, held by Amy Molleson, whose husband taught Miss Batten to fly.

Increased Nickel Production

Canada's Output For April Exceeded Only Once Before

Ottawa.—Nickel, essential alloy in the production of armaments, is once more front page news.

The bureau of statistics has announced production figures for April. The total is 12,934,418 pounds, the second greatest month in the history of production in Canada. Only once, back in November, 1929, did Canada's nickel mines exceed such volume.

In the four months ended April 30 last, production ran to 39,898,099 pounds which exceeds that of the corresponding period of 1929 by close to three million pounds. Thus 1934 is now well launched in a record-breaking year in the output of a metal demanded the world over in the making of war supplies.

International Nickel, at Sudbury, the major producer in the world, enlarged its plant after the peak year of 1929 and last April brought its fourth furnace into operation.

The company is now running to full capacity. So, it is reported, is Falconbridge, the other large producer in Canada.

Anyone who doubts what is afoot in world armaments factories need only scan the statistics. Canada, it must be remembered, holds a virtual monopoly on this metal.

In 1932 the output was 30,000,000 pounds. In 1933 the total zoomed upwards to 35,000,000 pounds.

And in 1934 the prospect is for a production of about 120,000,000 pounds which will be some 10,000,000 more than the peak year of 1929.

Leave For Northern Posts

Edmonton.—Priests, Royal Canadian Mounted Police, mining men, prospectors, trappers, traders and missionaries formed the band of 100 northerners who took train for Watways, Alta., on the first leg of journeys to sub-Arctic posts.

Visit World Fair

Chicago.—Captain Maurice Rossi and Lieut. Paul Codas have arrived here from Montreal, to visit the world fair.

Recognized For Discovery

Doctor Of McGill University Finds "Balancers" In Blood

Montreal.—World-wide recognition has come to Dr. J. B. Collip, head of the department of biochemistry at McGill University, for his discovery of new substances in blood which play the part of balancers and which may be new personality chemicals.

Dr. Collip reported his discovery before the Association for the Study of Internal Secretions meeting at Cleveland with the American Medical Association.

Some physicians who heard of Dr. Collip's discovery believed it might open an entirely new field in medicine. The chemical balancers appear to act as stoppers against effects of the hormones which the body produces from its endocrine glands.

The endocrine hormones in turn regulate growth, energy, color of complexion, sexual development, bodily contours and numerous other characteristics often associated with personality and health.

The medical search for the balancers is "antagonist" and they differ from "antibodies" which the body manufactures to protect itself from disease. One of the "antagonists" has been found definitely in animals, another shows traces, and there is evidence the same chemicals exist in human blood.

May Tour Canada

Hawker Fury Planes Coming To Toronto In July

Calgary.—There is every possibility the five Hawker Fury planes of the Royal Air Force that will visit Toronto next month will make a tour of the Dominion, George Ross, executive secretary of the Canadian Flying Clubs' Association, said here.

The machines, which carry a personnel of 16, are expected to arrive at Montreal, June 20. They have been invited to attend the Calgary Stampede in July.

STUDY INCREASE OF COARSE GRAIN ACREAGE IN WEST

Ottawa.—Plans to assist in the readjustment of Western agriculture by increasing the acreage of coarse grain to make up for reduced wheat growing are under consideration here at a meeting of the grain research committee. The group is meeting under the auspices of the National Research Council and is endeavoring to formulate the best suggestions men of science have to offer to Canadian agriculture.

Deliberations so far have centred on the thesis that the acreage sown to coarse grains, barley, oats and flax, in Western Canada might be increased by some 3,000,000 acres without creating any embarrassing surplus. The estimate is based on prospective markets for coarse grains in the United Kingdom and Europe and for feeding purposes in Eastern Canada. Quality and quantity production is needed to take advantage of the market and research is being conducted along these lines.

C. B. Davidson, of the Dominion bureau of statistics, who opened the discussion of the existing economic situation, advanced the following observations:

1. The carrying out of a policy in regard to barley is the first step to be taken in the reduction of wheat acreage and the improvement in the quality of the wheat crop of Canada (high grade barley tends to grow in areas which produce low grade wheat).

2. Claims there have been over-expansion and over-production in Western Canadian agriculture cannot be applied to cereals generally.

3. The world trade in coarse grains in recent years has exceeded the world trade in wheat.

4. Wheat acreage in Europe increased by 6,500 acres between 1924 and 1933. The coarse grain acreage remained almost constant.

5. The use of corn in feeding markets is markedly on the increase, particularly in the United Kingdom.

6. Germany the only importing country which has reduced her import requirements of feed grains.

7. In Eastern Canada there is a demand for feed which barley might meet, particularly if water transportation were used.

8. At the present time Canada does not possess the coarse grains with which she could set out to secure a share of the market available.

CREDITORS OF GERMANY NOW FACING PROBLEM

Berlin.—Germany has told foreign creditors they will receive no interest for at least six months on medium and long term obligations, including the Dawes and Young loans, to the payment of which the "full faith and credit" of the Reich government was pledged.

The moratorium was not unexpected, but the announcement placed the problem of what to do about the financial condition of Germany squarely up to the creditors.

The position of Germany as outlined in a communique of the Reichsbank announcing the moratorium, is that transfer of payments out of the country is impossible because of the low supply of gold and foreign exchange and that there would be no profit to anybody in devaluing the mark.

The mark, now almost wholly a national currency, has been held firmly on its "gold standard" basis, although the gold coverage has dropped below 3.7 per cent.

The Reichsbank statement dealt with all obligations except the Young and Dawes loans, and was followed by an announcement from the ministry of finance that interest and amortization on these would be suspended "for the time being until further notice."

Payments on the other obligations were suspended for six months beginning July 1, 1934, the bank statement said. These payments already were on a restricted basis, but the Dawes and Young loan had been exempted from previous partial payment arrangements.

These two important loans were floated to refund certain obligations of Germany resulting from World War reparations.

The Dawes loan, issued in 1924 to induce currency stabilization, bears interest at 7 per cent., and the Young loan of 1930 is on a 5½ per cent. basis.

Saskatoon Man Killed

Dental Technician Had Just Started On Business Trip

Saskatoon.—Scarcely out of the city on an extended business trip which was to have taken him to the Pacific coast and through the western United States, Leo Lipkovic, dental technician, met violent death as his car skidded and overturned in the accident. The accident occurred about 16 miles north of the city on highway No. 5.

Two other occupants of the ill-fated auto, Abe B. Handelman, and Louis Wener, explained that Lipkovic had got into difficulties when the car had skidded in loose gravel at the edge of the road. The driver had attempted to pull the vehicle onto the roadway and in so doing overturned it. Coroner A. M. Molloy, M.D., ruled no inquest was necessary.

Continuing Debt Payment

Pretoria, South Africa.—Disregarding the war debts controversy abroad, the Union of South Africa is continuing her payments to Britain. She has just paid the last six month instalment of £178,850, roughly \$895,000, and intends paying the next instalment in December, regardless of whether the British government reaches a final settlement with the United States by that time.

Paying Bounty On Wheat

Dublin, Irish Free State.—The Irish Free State department of agriculture has announced it will pay a bounty of \$2.12 a barrel for home-grown wheat. The department said the amount paid per barrel of home-grown wheat during the season ended April 18 was \$6.25. It added it had been found the average price for such wheat was \$4.12.

Holding Field Day

Regina.—Canadian Seed Growers' Association will hold a field day on the farm of R. D. Kirkham, Saltcoats, July 26. Field day meetings under the crop testing plan are being arranged for in Saskatchewan under the auspices of the federal seed branch, provincial department of agriculture and Dominion experimental farms.

Praised Ottawa Accords

London.—The Ottawa accords at the 1932 Imperial conference contributed more than anything else to the improved conditions in England during 1933. Sir Arthur Shirley Benn, M.P., president of the Imperial Federation of Chamber of Commerce declared here, following a meeting of that body.

Miss Zak, of Kimberley, is a house guest of Mr. and Mrs. H. Zak here.

Before marriage a man years for a woman. After marriage the "y" is silent.

J. R. McLeod, of The Enterprise staff, was a visitor to Spokane during the week.

So many Alberta towns and districts have voted in favor of beer parlors lately that further plebiscites seem an unnecessary waste of money.

The T. Eaton Company paid out dividends of \$4,730,000 in the past nine years, in addition to a lump sum of \$940,000 paid to the Eaton family in 1929, it was revealed to the Stevens committee.

The Ontario elections clearly demonstrated the weakness of the Communist element in that province. The would-be parliamentarians will have another few years in which to figure it out.

Mrs. Kew, wife of W. L. Kew, editor of the Staveley Advertiser, died Sunday in the Holy Cross hospital at Calgary, aged 45. She was a member of the Pincher Creek Rebekah lodge, and is survived by her husband; a sister, Mrs. Gillespie, Pincher Creek; and one brother, Harry Millar, in Ontario.

The football draw will be made at the dance in the Columbus hall on Monday, July 2nd.

Someone has suggested a tug-of-war contest as part of the programme at the Castle River sports. With Ole Olsen as the anchor, Blairmore could send a good lineup.

Tony Lisa went to Medicine Hat over the week end, where he met his bride, Miss Julia Orsato, direct from Italy. Mr. and Mrs. Lisa will make their home in Blairmore.

Sir Frederick Banting's full name now, if he should care to write it, is Sir Frederick Grant Banting, M.B., M.D., M.C., M.R.C.S., L.R.C.P., D.Sc., L.L.D., Sc.D.

Corporal "Moike" Moriarty, of the R.C.M.P., has returned to Drumheller after a sojourn to Toronto, Buffalo, Chicago, St. Paul, Minneapolis and other villages. He spent thirteen days at Chicago and visited the World's Fair.

Celin Chabotaux, an old timer of Blairmore, passed away suddenly on Friday last at his home in west Blairmore. He is survived by his wife and one son. The remains were laid to rest in the Union cemetery on Sunday afternoon, the last rites being administered by R. Wootton.

Local and General Items

The Editor will be pleased to receive items for this section, regarding visitors entertained, parties leaving for holidays or short trips, bridge parties, teas, etc. Please items in to 11 or hand them in at The Enterprise office no later than Wednesday evenings.

Charlie says: "Join the Oxford Group, boys, and pay your bills."

The Brownies-MacMillan case is scheduled to come up for hearing in the Alberta courts on Monday next.

Il Sig. Renzo Rinaldi of Blairmore domenica fece visita al Sig. Sorrentino—Michel-Natal Observer.

The Fernie auxiliary of the Dramatic Order Knights of Khorasan (Dokays) will stage a dance in the K.P. hall at Fernie on July 2nd.

A thousand trees each were planted this year by the 89 Boy Scouts and Scouters attending the sixth annual reforestation camp at Angus-Ontario.

Jimmy McCool was making his funeral arrangements, and nominated four bank managers as pallbearers. "Why?" he was asked. "Well, they have carried me all my life, so they may as well carry me when I'm dead!"—Michel-Natal Observer.

The fishing season opened with a considerable bang on Friday last. A bang in more ways than one, perhaps, for those who availed of the opportunity of trying their luck at Beaver Mines Creek, where only one out of ten hundred fish was believed to be of legal length or build. Unfortunately for some of them—and perhaps most of them—the day was anything but enjoyable. Almost any moment a good honest fisherman, and as well a good honest citizen, could expect to have his bag and baggage searched for various things, including undersized fish. Whether or not action has been taken against any, we have not heard, but parties coming in from the Beaver Creek district on Sunday evening reported that signs had been posted, declaring the creek closed for a period of five years; but, upon enquiry, we find such was not the case, the signs having been placed without authority of the fisheries department.

Ed. says a train smokes a lot, and also chocs.

The North Fork stamped on Saturday last was fairly well attended.

Rumor has it that Harvey Murphy was a candidate in the Ontario election campaign, but evidently not under the name of Murphy.

V. A. Bowes, of the C.P.R., Calgary, has been elected grand master of the Alberta Grand Lodge of Masons.

It's easy to tell about flannel pants: If the cleaner thinks them one-third, they are cotton; if moth remove a third, they are pure wool.

C. J. Tompkins, district deputy, and W. H. Chappell represented Blairmore Lodge at the annual provincial grand lodge session of Elks at Calgary on Monday and Tuesday.

At Pincher Creek the town tax rate for 1934 has been set at 42 mills, separate school 44 mills, being an increase of one mill and three mills, respectively, over last year.

There's a difference: When a woman gives a party, she's afraid that some one of the guests might go home hungry. But, when a man gives a party, he is afraid that some one of his guests might go home thirsty.

Throughout the entire province of Alberta, 55,682 persons were listed as recipients of relief as at June the 1st this year, compared with a total of 52,551 men, women and children shown on the relief lists at the same time last year, an increase of 2,231.

A school teacher asked the pupils to write a short essay and to choose their own subjects. A little girl sent in the follow-up paper: "My subject is 'Ants'. Ants is of two kinds—ants and lady uncles. Sometimes they live in holes and sometimes they crawl into the sugar bowl, and sometimes they live with their married sisters. That is all I know about ants."

FOR SALE—Frigidaire, practically new, at less than wholesale price. High-grade Chesterfield suite, like new; also Victor Combination Radio and Gramophone, excellent condition, at a bargain price.—Apply Mrs. J. A. Barbour, Bellevue Pharmacy.
